Names of General Use Insecticides

This table lists the trade names of insecticides available to homeowners and other residents. The common names of the insecticides are followed by the italicized chemical names and the capitalized commercial trade names. The insecticides listed in parentheses will add some control to the situation, but the one in the heading will be as effective or more effective in controlling the pest. Some products may be available under a variety of trade names that are not listed in this table. Be sure to read the label. The label on the container always lists these products by the common name or chemical name.

List compiled by Philip L. Nixon, Extension Entomologist, University of Illinois, November 2011.
